

Khushal Dusane

Data Analyst / MIS Executive

+91 9730116026 • Mumbai /Pune • khushaldusane2003@gmail.com [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

- Data Analyst graduate with hands-on experience in SQL, Power Bi, Excel, Python for analyzing large datasets and generating actionable business insights.
- Uncover hidden insights and patterns by leveraging diverse packages like NumPy, Pandas, Matplotlib, and Seaborn for Data Manipulation and compelling visualization.
- Bridge the gap between data and actionable insights with proficiency in querying and managing a wide range of databases including MySQL, PostgreSQL and MS SQL Server

Skills

Programming Language: SQL, Python

Packages: NumPy, Pandas, Matplotlib, Seaborn

Databases: MY SQL Workbench, MS SQL Server, PostgreSQL

Tools: OpenAI, Power Bi, Looker Studio, Excel (Advance Formulas, Pivot Tables, Power Query, VBA/Macros), VS Code, GitHub, Jira

Hard Skills: KPI Reporting, Data Modeling, Data Validation, Data Visualization, Data Cleaning, Exploratory Data Analysis, ETL

Project Experience

Bike Sales Data Analysis | SQL

Tools: SQL | MySQL Workbench [GitHub](#)

- Engineered SQL queries using JOINS, CTEs and Window functions to analyze 1,400+ orders and customer behavior.
- Developed customer segmentation analysis based on spending patterns, enabling targeted marketing strategies.
- Analyzed YoY revenue growth and quarterly business performance using window functions, identifying seasonal trends across multiple years.

Loan Default Risk Analysis | Power Bi

Tools: Excel | Power Bi [GitHub](#)

- Analyzed 11.61% portfolio default rate and ₹4B defaulted exposure, identifying LTI as a key risk driver.
- Developed Power Bi key risk dashboard analyzing 30k defaulted loans across LTI, DTI, credit scores and segments
- Recommended LTI based underwriting controls and combined risk scoring, targeting borrowers exceeding 3x LTI thresholds.

Bank Analytics | Python

Tools: Python | AI [GitHub](#)

- Built a modular Python data pipeline that processed 10k+ bank customer records through 6 stages data loading, cleaning, Feature engineering, computing metrics, data visualization and report, automating the entire analytics workflow with the help of AI to write complex codes reducing manual work and analysis time by ~80%.
- Identified critical churn patterns using rule-based risk scoring: discovering customers aged 50-60 showing 56.21% churn and flagged 723 high-risk customers worth ~2.5B in potential revenue protection.
- Engineered 5 business features and automated 6 visualization + reports with transparent, rule-based risk scoring.

Cohort and Project Experience:

Advanced Financial Modeling & Valuation Cohort – (The Valuation School)

2025

Conducted financial and market data research, leveraged advanced excel to build automated financial models, dashboards, professional reports and valuation analyses and applied financial knowledge to analyze company performance, forecasts and business drivers.

Project:

Mankind Pharma Financial Model | MS Excel

Tools: Excel

[GitHub](#)

- Conducted comprehensive valuation of Mankind Pharma Ltd. using DCF and Relative Valuation approaches.
- Estimated intrinsic value of ₹1,417/share (Perpetuity Growth) and ₹1,153/ share (Exit Multiple) against market price ₹2,530, indicating 44-54% overvaluation.
- Prepared Pitch Deck for valuation projects, clearly communicating assumptions, valuation results and investment insights in a professional presentation format.

Certifications / Achievements

SQL Advance | HackerRank [Certificate](#)

LeetCode SQL50 Badge

Data Analytics | Udemy [Certificate](#)

Advance Financial Modeling and Valuation | The Valuation School [Certificate](#)

Education

BSc Computer Science

SPPU University | Nashik, India

CGPA: 7.5

Computer Science graduate with hands-on exposure to data analysis, Excel dashboards, data cleaning, structuring, SQL, Business Intelligence and reporting, with a focus on transforming complex datasets into meaningful insights for data-driven decision-making.
