Summary

Data Analyst with hands-on experience in SQL, Python, Power BI, Tableau - specializing in banking analytics, risk reporting and process automation. Proven track record reducing manual effort by 80% and surfacing ₹2.5B in revenue protection across financial datasets. Translating analysis into storytelling format for non-technical stakeholders for quick understanding.

Skills

Programming Lang: SQL, Python (NumPy, Pandas, Matplotlib, Seaborn)

Databases: MYSQL Workbench, MS SQL Server.

Analytics & BI Tools: Power Bi, Tableau, Advanced Excel (Power Query, Pivot Tables)

Data Analytics: KPI Reporting, Data Modelling, Data Quality & Validation, Data Visualization, Data Cleaning, Exploratory Data Analysis, ETL.

Process & Operations: Process Automation, Risk Analysis, Transaction Analysis.

Other: OpenAI, VS Code, GitHub.

Project Experience

Bank Analytics

Tools: Python, OpenAI, Pandas, NumPy, Matplotlib [GitHub](#)

- Built end to end ETL pipeline processing 10k+ records, reducing manual processing by 80%. Performed customer segmentation and churn analysis identifying overall churn rate of 56.21% and flagging 723 high-risk customers representing approximately ₹2.5B in revenue protection.
- Summarized findings in an executive-style report/dashboard for non-technical stakeholders, translating risk metrics into business recommendations.

Loan Default Risk Analysis

Tools: Power Bi | Tableau | Excel [GitHub](#)

- Analyzed 30k+ defaulted loans using Power BI, identifying risk drivers across LTI, DTI, credit score and customer segments; evaluated an 11.61% default rate and ₹4B defaulted exposure.
- Built an interactive Power BI risk dashboard and generated actionable insights, recommending LTI-based underwriting controls for borrowers exceeding the 3x LTI thresholds.

Dunnhumby Retail Analytics

Tools: MYSQL | Excel [GitHub](#)

- Extracted and analyzed 2.5M+ multi-score records using advanced SQL (CTEs, Window Functions) to monitor data quality and track Week-over-Week revenue trends.
- Conducted exploratory analysis across 92k+ products to uncover margin optimization opportunities, delivering actionable KPI reporting to support data-driven business decisions.

Certifications & Training:

Advanced Financial Modeling & Valuation Cohort – (The Valuation School)

Oct' 2025

Mankind Pharma Financial Model | MS Excel [GitHub](#)

- Performed DCF and Relative Valuation for Mankind Pharma, identifying 44-54% overvaluation against CMP and synthesizing key findings into an investor pitch deck.

Education

BSc Computer Science

SPPU | 2024

Relevant Coursework: Statistical Analysis, Machine Learning, Database Management System
